STRUT MOUNTING KITS AND PROTECTION KITS

- While changing the strut mounting it should be also considered to exchange the rubber buffer and dust cover boots.

- GSP protection kits are an efficient and easy solution as no extra labour time is needed and the kits include a full axle repair set with two rubber buffers and two dust covers.
  New protection kits will improve car handling and driving safety under every road condition.

- GSP protection and strut mounting kits contain the necessary accessories for professional part replacement.
  The combination of new strut mounting and protection kits ensure a longer shock absorber life-span.

- GSP starts with a new range of over 100 protection kits and has already 550 strut mountings and around 500 strut mounting kits available.
