WHEEL HUB REPAIR KITS

Flanges get axial run-out due to thermal loads which leads to brake judder. As the workshop needs to disassemble the flange and bearing, repair kits allow to renew the flange during wheel bearing repair without extra work.

These repair kits are already popular in France, Spain and the United States of America.

Advantages of GSP wheel hub repair kits:

- All needed components for a professional repair are included.
- Advantage of a full service repair solution to create additional business for wholesalers and workshops.

GSP offers 70 references for this new product line now and extends the range continuously.
